ABSTRACT

As everyone knows, clouds can be seen everywhere. From your backyard, from your car while traveling or even when you’re going to sleep through your bedroom windows. But how many children know that clouds are all different. Actually, parents can teach them anywhere anytime, have some fun spending their time together. These days, parent always teach their children via phones, tablets or even computers. It should be better if we have a book that will give knowledge and some fun at the same time. This book aims to give knowledge about types of clouds by making science more interesting and also show how important of the clouds.

For the design, this book aims to give feeling of calmness and friendly in order for the children to have fun and give them knowledge during reading this book. Moreover, this book is designed by using watercolor painting style that will make this book more attractive for children.

In conclusion, I hope that this book will make children have fun and easily understand what a cloud is. Family will have a good time together and also they will have a good relationship.
