

Au Golden Rock

“Au” the abbreviation of Assumption University coincides with the chemical term “Aurum”, which means “gold.” Gold has been a symbol of goodness and value for ages. The big golden rock, closest to the Tawweepwithaya Bridge, is to remind students every morning when they arrive that when they graduate from Au they are expected to be as good as gold. The chemistry in the golden rock is an element that forms the virtuous composition of the atmosphere. For most students their student life will end after graduation and they will enter a new phase of life. Whatever career or path in life they choose, goodness will be an ingredient of their success.
