

ABSTRACT

I had a dream to make my own animation, to create my own world. Back to when I was still a sophomore, I visited Visual Communication Arts thesis exhibition and I interested in a senior's project. A Visual Development which was created using Adobe Photoshop and After Effects. That made me want to make my own concept art a type of art which people can really enjoy. Even it has been very hard and challenging because back then I didn't know about how to draw a good background and paint but I still had a dream and I promised to myself to achieve it.
