

ABSTRACT

This dissertation is about illustration artwork to represent another side of beauty. I created two parts. The first to told about positive effects and the second side is about negative effect of when the woman wearing makeup. The objectives of the project are to show side of effect and give information that why makeup is important for women and remind them of cosmetics.

My work has 2 main. The first one is positive effects “Women wear makeup to follow the natural”, “women wear makeup to conceal her face,” “Women wear makeup to satisfy in needs.” The negative effects “Cosmetics destroy your skin,” “Cosmetics make you look older,” and “Cosmetic makes you look fake”

My work is named “Illustration of another side of beauty” The first step is to do research about cosmetic’s information and do the questionnaire to ask the women why wear makeup. I divided my work with two tones, warm color and cold color for easy to understanding about the positive and negative effects.

In conclusion, this project has taught me a lot on how to do the collage technique and how to arrange artwork well, and improved many skills during this thesis project.
