

ABSTRACT

Since technology is getting enhancement, A computerized system is on of the technology that is going to replace the manual system of which will be obsolete one day in the future.

In recent years, the business of Soon Hua Seng group has expanding rapidly, therefore, it has impacts on company operations. Department especially Accounting Department and Marketing Department are confronting with overwhelming work. Therefore to keep up with the workload, computer must be introduced to assist managing organizing and controlling its business process .

This project was developed to improve existing system operation at Accounting Department and Marketing Department. The emphasis is on computerization as to provide the right information at the right time. Several reports can also be generated as output of integrated data for planner and management to use as tool in planning, forecasting and decision making.
