ABSTRACT

With the passage of the time, every organization grows in terms of size, complexity and specialization. The demand and needs of reliable, accurate, timely and economical information by people at all levels of the management also grows, at much faster rate. Thus in today's context of information needs, without computerization manual provision of information is inadequate. With the help of Inventory system for Electrical Household Appliance Industries the work flow in Purchasing, Production, Planning and Inventory have smoothed a lot and are highly reliable and predictable. This project was mainly concerned with Purchasing Department and in this Project we covered all suppliers and now Planning Department of Hatari Ind.

This system is developed to improve the work efficiency and capability of supplying the raw materials on time plus providing the accurate information about the raw material. The scope of this project is mainly involved in providing the Production Department with timely supply of raw materials to decouple their manufacturing process. This project aims at providing a computerized system to the employees at Inventory and Purchasing Department in order to carry out their work efficiently and accurately to meet the increasing demand of their business functions. The new system proposed is developed in accordance to the system Analysis and Design techniques. The new system project discusses the user requirements, system design, hardware and software requirements, security and control and also includes the design of input screen.

This system has been successfully has been implemented on Microsoft Access. This system would have been more successful if we can extend this from Marketing/Sales to Logistic the problem with the present project is that some part of company is automated and some part is still dual all the things manual so I will suggest management to computerizes their all company and put them on LAN so that there is easy access to other departments and above all I will recommend that Purchasing and Marketing Department should have easy access to Internet.
