

ABSTRACT

Q-IT System (Thailand) Co., Ltd. was established in 1997 and currently has more than 150 professional service staff offering expertise and technical skills in consulting, technical support and education services. The company offers its development tools and internet-enabled business application product for customer relationship management, finance, human resource and manufacturing to over 160 Thai customers. Q-IT offers its products, along with related consulting, education and support services.

Q-IT Company has grown rapidly to become one of the leading companies in the computer software industry. The main product is tools and applications. The current existing system is based on the manual and some computerized system. Most of data are stored on paper, while some parts are kept in the Microsoft Excel. The new proposed system with integrates with the relative system. All data are kept in the database server, Oracle 9i, and are accessed through the server, Microsoft Windows NT 4.0 which is the same as the Self-Service Database. It will reduce the number of administrative staffs, solve the problem of manual system and decrease the high maintenance cost.
