

Abstract

Role of the Catholic School is to support the development of the whole human being (Physical and Spiritual). More than that, Saint Gabriel's College aimed to organize the proper education in response to the Global Society. Therefore, the school has been preparing students to be part of the Asian Community in 2015. The development on education in the universal dimension needs to form the new young generation to be ready globally, with visionary, technology and spirituality. To cover these objectives, school needs to form the new leaders for the future.

From the fact at present, most of the school activities are led by teachers. Teachers prepare content, equipment and doing all process of organizing. Researcher uses this aspect to be part of the action research titled: Assessing and Developing on Student's leadership skills; A case of Saint Gabriel's College. Aimed to finding the appropriate activities that can be used in the developing process for students to be good leader, based on the knowledge and theoretical framework of the Organization Development, researcher focused on 40 students from Secondary 3 to Secondary 6 as a sample group, and using Interview, Questionnaire and Observation as the data collection techniques in this research.

The finding of this research indicated that the leadership training for students specific in the role as Master of Ceremony has the positive response to the hypothesis. This kind of activity can assess and develop the leadership skills of students. It is the implementation of activities that are proper for the organization development.
