

ABSTRACT

E-learning is an outcome that comes from the advent of information technology to education system. It brings a great change to such system together with the coming of many benefits. It is a new trend for education and also this trend has become more and more popular. E-learning is used for many purposes. It can be used as a training center or as a knowledge warehouse for company's staff. Moreover, it can be used as a tuition center business. Many tuition centers expand their distribution channels through the Web site (Intranet or Internet) because they realize the benefits of e-learning which helps them gain more benefits than using only traditional channel.

The purpose of this project is to reduce the training and operating cost of the company and develop the employees by education through Intranet Web Site.

Although e-learning technology cannot replace the traditional education system, it can help improve the traditional system and enhance the efficiency and effectiveness in distributing knowledge and information.
