ABSTRACT

The objective of this study is to focus on Electronic Auction which the main strategy of government procurement which refers to procuring quality goods or services in the amount of 2 million baht and above passed through internet system as real-time online as complied with enforcement regulations by the Comptroller General's Department of the Ministry of Finance. Thus, this will increase transparency and effective policy on such procurement to become standard similar to international. Nonetheless, the current Electronic Auction strategy is still imperfect and that leads to the unfair competition as well.

It is found that Thailand still struggles to deal with fraud problems concerning conspiracy in bids collusion in government procurement. In this regard, although Thailand already enhances some measures on working with web based applications via a single internet site by sealed bid auctions instead as the restriction. In fact it's probably still operate wrongfully together with public and private sector which intend to conspire on deterrent fair competition without concerning the law anymore. Further, this type of problem is actually comes up with connecting physical individual among them closely before time of bidding competition show. Therefore, it is a lead to created heaven on severe problem is running on Thai government procurement as initiation list needed to secure urgently.

It is recommended that it should be operated with a public show on the web site of the Comptroller General's Department of the Ministry of Finance with the object of disclosing transparency and effective government management including with determined bidder needed to ask for approval to get a smart card issued by the general department and along with needed to ask for approval to get digital signature

also before participate in bidding competition begin and the last one is an individual person shall be recognized to pay respect upon rule of the law with restrictively also.
