

## ABSTRACT

This project is on analysis, design and implementation the rice surveyors information system to Adil International Surveyors Co., Ltd. Because of finding the problems of the company in term of wasting time and cost. The objectives of this project are to solve labor intensive works, duplication of works, wrong and late decision making, no back-up documents and aid the follow-up work.

The decision support system for this company is also made to know the effect on profit or loss when one of the parameters is changed.
